

Gambling Application Limitations

Updated August 28, 2009

- The print buttons on the transaction screens are not available. The transaction reports are available for printing individual transactions.
- The Gambling screens do not have the buttons in the error box at the top of the screen, like CDS has.
- The Firefox browser does not work between Gambling Admission/Discharge screens and Client Management/Home page screens.
- Internet Explorer 7 displays more certificate messages than Internet Explorer 6.
- The Back button does not operate correctly in this scenario:
 - Home Page to Admission page 1
 - Continue button to Admission page 2
 - Save with a business rule error message, fix the data, successful Save
 - The Back button does not go back to page 1
- After changing the Admission/Discharge date and clicking the Save button, you need to click Save again. Then the transaction successful message should appear.
