The client number assigned at the time of first admission must be used for every subsequent admission to this PRU and should never be reassigned to another client. Do not use the client's social security number as the client ID number.

For all methadone patients, the identification number assigned by the Methadone Central Registry must be used. The identical patient number assigned at the time of first admission to any methadone program must be used for every subsequent admission and cannot be assigned to another patient.

An assessment visit is a visit occurring prior to, or on the same day as, (1) an admission for treatment services, (2) referral to another provider for chemical dependency treatment, or (3) another...
disposition or termination of the assessment process.

An **assessment day** is any day, or part of a day, spent by an individual as an inpatient or resident being assessed to determine his/her need for inpatient or residential treatment, prior to actually receiving treatment services.

"Significant Other" means an individual who is related to, a close friend of, associated with, or directly affected by, a chemically dependent person. Chemical dependence treatment should include services to the significant others of those who are chemically dependent or abusing, in recognition that addiction has a significant negative impact on such individuals. Significant Others may be admitted to the chemical dependence service as individuals, regardless of whether the addicted person is in treatment, or they may be treated as part of a family. *If a person is experiencing problems with alcohol or substances requiring treatment, they should not be admitted as a Significant Other.*

By regulation, Chemical Dependence Outpatient programs (Part 822), Non Medically Supervised Chemical Dependence Outpatient programs (Part 821) and Outpatient Chemical Dependency Services for Youth programs (OCDY) (Part 823) are permitted to admit Significant Others for treatment services.
