Workscope and Program Action Report (WPR) Application
Release Notes

This document lists changes made to the WPR application since its first full release on February 28, 2011. Enhancements and functionality changes for each release are listed under the release date.

February 26, 2015 – Version 2

Function or Feature	Roles Affected	Description
Workscope Approval Process Removed	All	All workscopes from 2/26/15 forward are created as Performance-only (automatically approved).
PARs	LGU	NYC PARs for directly funded or non-funded programs no longer require approval of the NYC LGU.

May 26, 2011

Function or Feature	Roles Affected	Description
Email Notifications for workscopes and PARs	All	- Initial creation notification - Submission, approval, disapproval notification - Deadline reminders
PM search field choice on workscope and PAR search screens	Program Manager	A specific Program Manager can now be chosen.
Text field spaces (workscope and PAR) are trimmed before saving	All	If a text field only contains one or more spaces, the spaces will be removed so that the text field is empty.
Automatic Refresh of the Change Log	All	The Change Log will now automatically refresh so that there is no longer a need to leave the application and log in again to see the changes made reflected in the Change Log.
Performance only types of workscopes should not be editable	Admin	Applications unit found and corrected this bug.
The Email Sent to column was removed from the workscope and PAR UIs	All	This column will not be used so it was removed from the Change Log details.

March 31, 2011

Function or Feature	Roles Affected	Description
BPM inbox	Regional Coordinator, Statewide Administrator	Added access to reassign workscopes and PARs to a different state or user.
Workscope Inquiry	Statewide Administrator and District Administrator	Added the ability to edit values after the workscope is approved.
Workscope Details Screen enhancements	All	- Added IPMES Flagged (PARs exist) message - Added display of Direct Care FTE values for prior 2 years - Added display of program's certified capacity - Display responsible Program Manager and field office
BPM Inbox Grab Actions	Statewide Administrator and District Administrator	Change Log records are now created for grab and move activity in BPM.
BPM Bulk Actions	Statewide Administrator and District Administrator	Made bulk actions available to the administrator roles.
Workscope Details Screen formatting	All	Corrected a formatting issue with the performance columns.
Workscope Details Screen	All	Corrected the bug when a Direct Care FTE was editable (and should not be) after submit/approve.
Workscope Details Screen report links	All	Removed report links and changed the column headings when prior workscopes do not exist.
Workscope Program Specific Objectives	Provider	Added the PSO Achievement Text entry functionality.
